## **TAXI SERVICE**

A taxi licensed to work at Riga Airport ensuring high quality of services and transparent pricing policy can be hired on the carriageway, which is located immediately at the exit from the arrivals terminal. Other taxi carriers also provide services in the Airport area; it is also possible to hire a taxi using one of the mobile applications.

A ride from the Airport to the city centre, depending on the traffic intensity, takes an average of 20 minutes.

### **Ride Fare**

You can pay for a taxi ride after the ride according to the tariff set by the carrier. The fare consists of a boarding fee, a distance fee and a travel time fee. Carriers' tariffs are available [here](#).

### **Rates**

Please note!

Information on taxi associations that have been issued licenses to work at Riga Airport and their fares can be found [here](#). The fare for a ride to the city centre is the same for all taxis of the respective brand. Fares of other taxis may be different and there is no maximum limit, therefore we recommend that you clarify the price of the ride before hiring.

# COVID-19

## COVID-19 and travelling to Latvia

- When entering Latvia from the European Union, European Economic Area countries and Great Britain, you do not need to present Covid-19 certificates or Covid-19 tests. The need to present a certificate or a negative Covid-19 test prior to entry is still maintained when entering from other third countries.
- Medical masks or FFP2 respirators without a valve should be used in public transport, except for taxis and other commercial passenger transport.
- It is still advisable to practice good hand and cough hygiene and do not travel if having any symptoms.

Map of Latvia

From 1 April 2022, the requirement to present an interoperable vaccination or recovery certificate or a negative COVID-19 test certificate for entry into Latvia has been revoked. Hence, this requirement will only apply to travellers from high-risk countries but is not currently defined by the Centre for Disease Prevention and Control ([CDPC](#)).
